Compilation of stress test peer review recommendations and suggestions

As part of the ENSREG Action Plan regarding the follow-up of the peer review of the stress tests performed on European nuclear power plants ENSREG decided to prepare by September 2012, a consistent compilation of stress test peer review recommendations and suggestions to assist the preparation or review of national action plans by national regulators. The compilation is provided in the attached PDF file.

ENSREG Action Plan for fact finding site visits

The ENSREG action plan specifies that a sufficient number of follow-up fact finding site visits would take place up to September 2012 to support the preparation of national action plans

and the October EC report to the European Council. Please find attached the list of the sites to be visited and associated data. These site visits shall focus on information exchange with respect to measures taken, planned or under consideration to improve safety as part of the national action plans.

ENSREG has adopted an Action Plan regarding the follow-up of the peer review of the stress tests performed on European nuclear power plants

The Action Plan specifies the need for country specific action plans and a regulatory peer review workshop to share lessons learned on the implementation of post-Fukushima safety improvements. It also specifies fact-finding follow-up site visits in order to better prepare for the peer review workshop. The outcomes of the peer review workshop will be presented to the public in the next ENSREG conference and the country-specific plans will also be publicly available. Furthermore, ENSREG decided to publish Quarterly Updates on the stress tests follow-up on this website.

ENSREG establishes a 10-year indicative schedule for International Peer Review Missions in EU Member States.

The Nuclear Safety Directive (1) requires that the EU Member States shall, at least every 10 years, arrange for periodic self-assessments of their national framework and competent regulatory authorities and invite an international peer review of relevant segments of their national framework and/or authorities with the aim of continuously improving nuclear safety.
