Fourth ENSREG Conference on Nuclear Safety, Brussels, 28-29 June 2017

ENSREG has held its fourth conference on nuclear safety on 28-29 June 2017 at the European Commission's Charlemagne Building in Brussels, Belgium.

For further information or if you encounter any difficulty, you can contact us:

Conference objectives

The aim of the conference was to provide an update on nuclear safety in Europe in a global context. The event addressed potential challenges for nuclear safety regulation, key recent developments in EU policy (directives on nuclear safety, on spent fuel and waste management and on basic safety standards) and emerging topics in the field of nuclear safety, such as long-term operation of nuclear installations and irregularities and supply chain control.

It was not a highly technical event but rather a forum to discuss topical issues arising in the nuclear sector with a wide range of stakeholders.

Participation

The conference was attended by speakers/panellists and participants from practically all EU Member States (including non-nuclear), representing a wide range of stakeholders, from several non-EU countries and from relevant international organisations, such as the IAEA or OECD's NEA. More than 250 participants attended the conference.

Following the conference

The conference was web-streamed through the ENSREG website and the video recordings are still available:

1st day:

<https://webcast.ec.europa.eu/4th-european-nuclear-safety-conference-ensreg-gasp-1>

Press conference (9:45-10:30):

<https://webcast.ec.europa.eu/4th-european-nuclear-safety-conference-ensreg-mans>

2nd day:

<https://webcast.ec.europa.eu/4th-european-nuclear-safety-conference-ensreg-gasp-2>

Questions or comments? Tweet to [#ENSREGConference2017](#).

Presentations and speeches will be made available via this website.

You can send any further questions and comments to: ener-lux-ensreg-conferences@ec.europa.eu.

Background

ENSREG is an independent, authoritative expert body created in 2007. It is composed of senior officials from the national nuclear safety, radioactive waste safety and/or radiation protection regulatory authorities from all 28 EU Member States and representatives of the European Commission.

The role of ENSREG is to help to establish conditions for continuous improvement and common understanding in nuclear safety and radioactive waste management. For more information on ENSREG's role visit <http://www.ensreg.eu/members-glance/role-ensreg>.
