ENSREG has adopted an Action Plan regarding the follow-up of the peer review of the stress tests performed on European nuclear power plants

The Action Plan specifies the need for country specific action plans and a regulatory peer review workshop to share lessons learned on the implementation of post-Fukushima safety improvements. It also specifies fact-finding follow-up site visits in order to better prepare for the peer review workshop. The outcomes of the peer review workshop will be presented to the public in the next ENSREG conference and the country-specific plans will also be publicly available. Furthermore, ENSREG decided to publish Quarterly Updates on the stress tests follow-up on this website. A copy of the Action Plan is provided in the attached PDF file.

Countries:

Austria
