ENSREG conference, Brussels 28th – 29 th of June, 2017

Geological disposal Consequences

Tiina Jalonen
Senior Vice President
Posiva Oy
Development

40 years' effort

Studies into geologic disposal started Site selection research

Selection of Olkiluoto

Construction of **ONKALO** and site

confirmation studies in Olkiluoto

of disposal facilities

2015

Construction

Start of disposal in the early Test operation, 2020's commissioning

> Application for the operation license

2012 2004

2001

1983

1978

1997 Application for the construction license

> Decision in principle by the Government and the Parliament

Government's decision on timetable

Construction license granted by The **Finnish Government** 12.11.2015

22 June 2017

DIP in 2001 on the geological disposal of SNF

Decisive arguments in Parliament

- "Aiming at final disposal is a better solution than just resorting to interim storing"
- "Option for retrievability of waste canisters must be maintained"
- "The present generation has to accept responsibility for nuclear waste"

Posiva's key elements

- Posiva has followed the main schedule made in 1983
- Being a pioneer is challenging scientifically, technically and economically
- In preparing for production, industrialization of the final disposal is our main focus
- The RB needs to maintain its independency but build and maintain competence
 - Open dialogue has been and is still needed!
