ENSREG CONFERENCE IN BRUSSELS

28-29.6.2017

Juha Poikola
Manager, Public Relations

CONCERN FOR COMPETITIVENESS OF NUCLEAR POWER

- Over-capacity in the electricity market and support mechanisms keep the market price low.
- Increased regulatory requirements and lack of standards reduce willingness and ability to deliver equipment to nuclear power plants, and increase costs.

PINC FOLLOW-UP ACTIONS

- Commission has a good understanding about the situation and remedies
- Concrete improvements can be found in harmonizing parts of licensing processes and reinforcing standardization of products & components used in power plants
- Allow more flexible use of standard series-produced components without compromising safety
- ENSREG is an important party to include in the preparation of proposals and initiatives
