

Experience of the 1st TPR

**2nd Topical Peer Review – 1st Stakeholder
Engagement event**

**Petteri Tiippana, Chair of 1. TPR Board
22.6.2021**

Highlights from the 1st TPR

- Topic selection is important (e.g. relevant for nuclear facilities, has safety/risk significance, technical vs. programmatic, criteria exists)
- Learnings from the process (process takes time, countries and experts need clear guidance, low public interest and participation)
- Concrete outcomes from the first TPR (self assessment, peer review, establishment and delivery of NAcP, work ongoing to address common challenges)
- TPR can be a significant instrument for EU regulators to ensure and enhance safety (full participation and commitment to ensure availability of experts, participation in the peer review, transparency)
