

Resolution of comments received about the Stakeholder Engagement Plan (SEP)

N°	Section number	Comment	Resolution
Comments from Joint Project – Nuclear Risk & Public Control			
1	n.a.	TPR Focus Group: In the stakeholder event on 22 June 2021 Patrick Majerus informed that such a Focus Group should be installed. There is no information about it in the TOR. Who can take part? What topics will the Focus Group work on? What is its role in the TPR procedure? Will NGOs be invited – how will this be organized?	The SEP provides for the development of terms of reference for a standing TPR Focus Group to enable different stakeholders to closely follow TPR activities and to provide input on a regular basis. Questions on participation, level of involvement, role and other organizational aspects will be defined by the terms of reference. No modification of the SEP.
2	00.3	Two stakeholder events are included in the TPR in which the public can take part: the first was in June 2021, the second will be at the end of the TPR in 2024. A third event in 2023 would be welcomed, to enable a debate on interim results with the interested public	Besides the two public meetings, the public general public and stakeholders will have additional information on TPR-2, such as the newly published fact sheets. The above 2 public consultations are organized to enable interested parties to interact with the TPR process. No modification of the SEP.
