→ ENSREG

The European Nuclear Safety Regulators Group (ENSREG) is an independent, expert advisory group created in 2007 following a decision of the European Commission. It is composed of senior officials from the national nuclear safety, radioactive waste safety or radiation protection regulatory authorities and senior civil servants with competence in these fields from all 27 Member States in the European Union and representatives of the European Commission.

As an independent authoritative expert body, ENSREG is working to:

- improve the cooperation and openness between Member States on nuclear safety and radioactive waste issues;
- improve the overall transparency on nuclear safety and radioactive waste issues;
- and as appropriate, advise the European Commission on additional European rules in the fields of the safety of nuclear installations and the safety of the management of spent fuel and radioactive waste.

ENSREG is also coordinating the Topical Peer Reviews, introduced by the revised Nuclear Safety Directive, with the input of the Western European Nuclear Regulators Association (WENRA) and in cooperation with the European Commission.
